

GR digiGOV-innoHUB

The European Digital Innovation Hub for Digital Governance

The European Digital Innovation Hub for Digital Governance – GR digiGOV-innoHUB supports the development of a new generation of public services based on advanced digital technologies (AI, ML, IoT, Blockchain, HPC), with open source, open data and open standards.

BENEFICIARIES

SMEs with innovative business ideas and solutions based on the use of cutting-edge technologies

Public organisations seeking for innovative solutions for the digital transformation of their services

OBJECTIVES

Advancing public services with cutting-edge digital technologies

Fostering regional and international cooperations in open government initiatives

Empowering Greek SMEs and civil servants: Enhancing digital skills for innovative public services

Building a collaborative ecosystem for digital transformation in Public Administration

Driving innovation in Public Administration via pre-commercial procurements

Leveraging digital technologies with open software, open standards and open data
